Technology Edifice

Technology Edifice

In a world where digital transformation is accelerating, we believe our role goes beyond simply providing hardware and software — we strive to be the cornerstone of our clients' business stability and growth in the Kingdom of Saudi Arabia.

SOFTWARE **HARDWARE** **CYBERSECURITY** **DIGITAL SIGNAGE**

Who Are We?

Technology Edifice is your strategic partner in building integrated IT infrastructure. We provide complete Software & Hardware IT solutions with a strong focus on quality and operational sustainability

🔒 Cybersecurity :

Advanced protection solutions from Fortinet, Palo Alto, Kaspersky, and others

🖥️Hardware Solutions:

Computers, networks, servers, security systems, and digital displays

💼 Software Licenses :

Microsoft 365, Adobe Creative Cloud, and Google Workspace

Computers and Office Solutions

**We offer a comprehensive range of computers designed to meet the needs of every sector, from professional workstations to mobile business devices.
With guaranteed compatibility and high efficiency.**

Screens

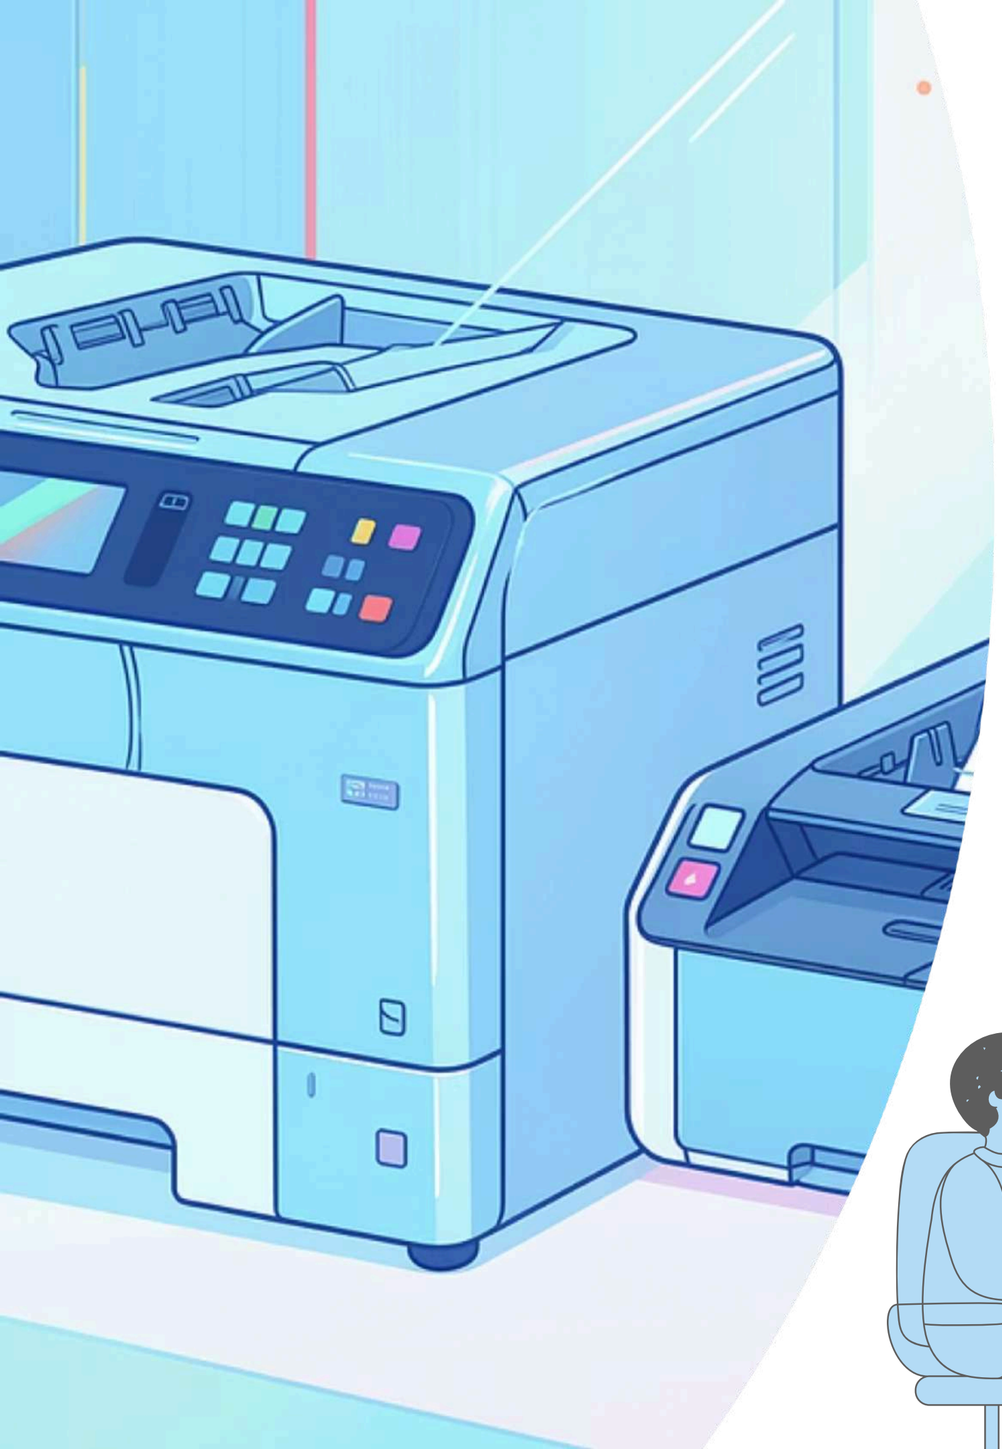

Regular displays for everyday use, high-definition 4K displays for designers, and curved displays that provide a comfortable and immersive visual experience.

Office equipment

Workstations for designers and accountants, and compact all-in-one devices that save space and combine high performance with elegant design

laptops

Rugged business devices, lightweight Ultrabooks, and 2-in-1 touch and pen-enabled devices for greater flexibility in mobile work environments.

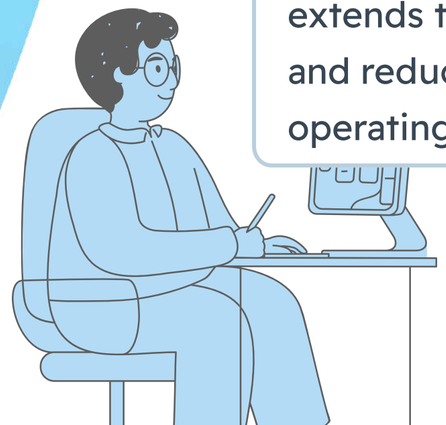

Printing and Ink Solutions:

We offer a comprehensive range of printing and scanning solutions, as well as original consumables, to ensure the highest levels of efficiency and quality in your work environment.

Original consumables

- Original Toners & Ink.
- Certified printheads.

It ensures high print quality and sustainable performance, extends the life of the device, and reduces breakdowns and operating costs in the long run.

Printers and scanners

- Color and black and white laser printers.
- Heavy-duty printers for large offices.
- Label and barcode printers.
- Fast scanners for documents and digital archiving.

Speed up workflow and reduce reliance on paper.

Infrastructure and servers:

We provide a robust technical infrastructure that starts with servers suitable for every facility size, through network storage solutions, and extends to spare parts and upgrades that ensure continuous performance.

Servers

Tower Servers for small and medium-sized enterprises, and Rack Servers for large data rooms — designed to handle escalating workloads

Storage

NAS units for centralized network storage, and high-performance SAN devices for enterprises that require ultra-fast data transfer speeds and reliability.

Spare parts and upgrades

RAM, SSD and HDD internal and external hard drives — to upgrade existing systems and enhance their performance without having to replace them entirely.

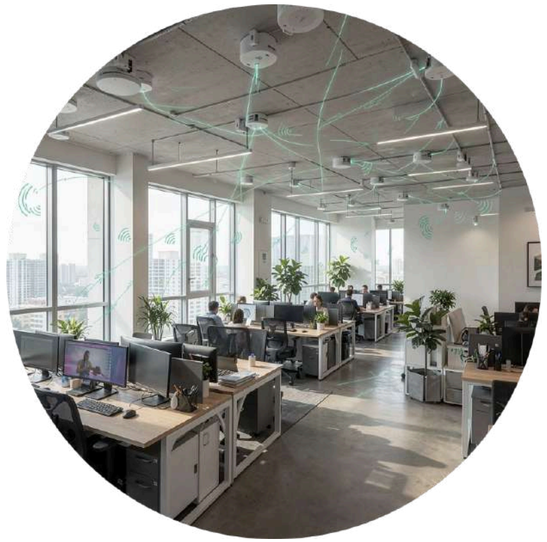

Networks and Communications

We establish a cohesive and reliable work environment by providing integrated network solutions that ensure data flow and effective communication between all components of your infrastructure.

Network Racks and Cables

Network cabinets/racks for organizing equipment, ultra-fast fiber optic cables, and CAT6/CAT7 cables for high-performance wired networks.

wireless networks

Access points and signal boosters provide stable and comprehensive wireless coverage throughout the facility with no dead zones.

Connecting devices

Routers and Switches of all types (Managed & Unmanaged) to meet the needs of every network — from small offices to large enterprises.

Security systems and digital displays

Security and control systems

- CCTV surveillance cameras: IP cameras, thermal cameras, and NVR/DVR recording devices
- Access Control Systems: fingerprint devices, facial recognition, and smart cards
- Electronic gates: pedestrian entry gates and smart parking gates

Interactive digital displays

- Advertising display screens operating 24/7
- Interactive touch screens for meetings and education
- Video walls for control rooms and galleries

Indoor Digital Signage

Smart digital signage creates an impressive first impression for your business, with an elegant design and configurations suited to extended operation.

- Wall-mounted displays for menus and reception areas, or freestanding units for entrances and corridors.
- 16/7 or 24/7 operation and brightness suited to ambient lighting, depending on the model.
- Content management via USB, Wi-Fi or CMS, with scheduling and split-screen layouts depending on the system.
- Full HD and 4K options, landscape or portrait orientation, and slim bezels depending on the model.

For restaurants, cafes and bakeries: digital menus and meal promotions. For clinics and hospitals: appointments and health information. For showrooms: collections and seasonal offers. For businesses and factories: directions and health and safety guidance.

Interactive Smart Boards

Smart boards combine a large display, multi-touch input and pen support to make presentations and collaboration easier, with a built-in operating system or a connected computer depending on the configuration.

- Write and draw with pens or fingers, with multi-user interaction. The number of touch points varies by model.
- Wireless screen sharing from devices when supported by the installed equipment.
- Meeting and education apps, with cloud saving or sharing depending on the system and licence.
- 4K display options and layers that reduce glare and protect the screen surface, depending on the model.

For classrooms, schools and universities; meeting rooms, presentations, project management and hybrid meetings; training centres, hospitals and exhibitions.

Large LED Displays

Modular LED walls turn facades and halls into expansive display spaces, with flexible configurations and dimensions and a seamless image without conventional screen bezels.

- Multiple sizes and configurations to suit the project space and installation requirements.
- Pixel pitch options selected according to viewing distance and the required resolution.
- Indoor LED for halls, studios, showrooms and shopping centres.
- Outdoor LED for facades and outdoor events, with brightness and weather protection suited to the model specifications and installation environment.

We review dimensions, viewing distance, lighting, ventilation, electrical loads and mounting requirements to select the right solution for the site.

Power accessories and protection

UPS devices

Uninterruptible power supply to protect servers and critical systems from sudden power outages

Professional accessories

Professional keyboards and mice, laptop docking stations, and adapters

Display and audio equipment

Projectors and integrated audio systems for meetings and conferences

Licensing and Software Solutions

Design and creativity

Adobe Creative Cloud suite and AutoCAD engineering and design licenses

Office programs

Microsoft 365 and Google Workspace licenses for productivity and corporate collaboration

Protection and security

Antivirus and Firewall licenses for data security

Operating systems and servers

Windows Server and VMware & Hyper-V virtual machine licenses

Cybersecurity and data protection solutions

Fortinet (FortiGate)
Data protection and comprehensive cybersecurity

Check Point
A leader in cybersecurity technologies

Palo Alto Networks
For major projects and superior protection

SonicWall
Customized options for offices and institutions

Sophos
Integrated and easy-to-manage solutions

Cybersecurity and data protection solutions

Forcepoint

Data protection and leak prevention (DLP)

Kaspersky & Bitdefender

Antivirus and anti-malware solutions

Veeam

Data backup and recovery solutions

Why Choose Technology Edifice?

1 More Than a Store A Complete Technology Partner

We build an integrated technological infrastructure; every piece of hardware or software solution is a building block in your success.

2 Technology as a tool for empowerment

We simplify technical solutions to serve humanity and facilitate workflow, moving away from complexity.

3 Long-term strategic partnership

We prioritize sustainability over quick profits, and the success of your systems is our measure of success.

4 Attention to detail and quality in impact

Quality saves costs in the long run — we select solutions that balance efficiency and sustainability.

5 Proactive in integrated solutions

We design our systems with a proactive vision that ensures uninterrupted workflow.

Technology Edifice: Your Partner in Digital Transformation

We don't sell a product — we contribute to building an integrated technological infrastructure upon which the future of your business in Saudi Arabia is built.
